

Tips for extending the life of lithium-ion batteries

Temperature

Minimise exposure to high temperatures in use or storage.

Minimise use at low temperatures, especially during charging.

Current

Avoid the use of fast charge unless necessary.

Avoid discharging the device faster than necessary.

State of charge

Minimise charge time to 100%.

Minimise charge time to 0%.

Other

Avoid use or storage in humid environments.

Follow the manufacturer's calibration instructions.
