

Why do we need a sustainable and circular bioeconomy?

Global challenges such as climate change and ecosystem degradation, along with growing demands for food and energy, force us to find **new ways of producing and consuming** in a world of finite resources.

The bioeconomy has enormous potential for...

Job creation

Create millions of green jobs, especially in rural and coastal areas.

Renewal and modernisation of the industrial fabric

Introduce innovations in agriculture, aquaculture, forestry and other industries.

Climate mitigation and carbon neutrality

Reduce atmospheric emissions and our dependence on fossil resources.

Ecosystem and biodiversity restoration

Aligned with the SDGs, recover part of the degraded ecosystems.
