

Agrovoltaic energy and its efficiency

Thanks to the combined application of agriculture and photovoltaics, the landuse efficiency of the agrovoltaic system can reach 186%.

Separate use of agricultural land

1 hectare of crops
1 hectare of solar panels

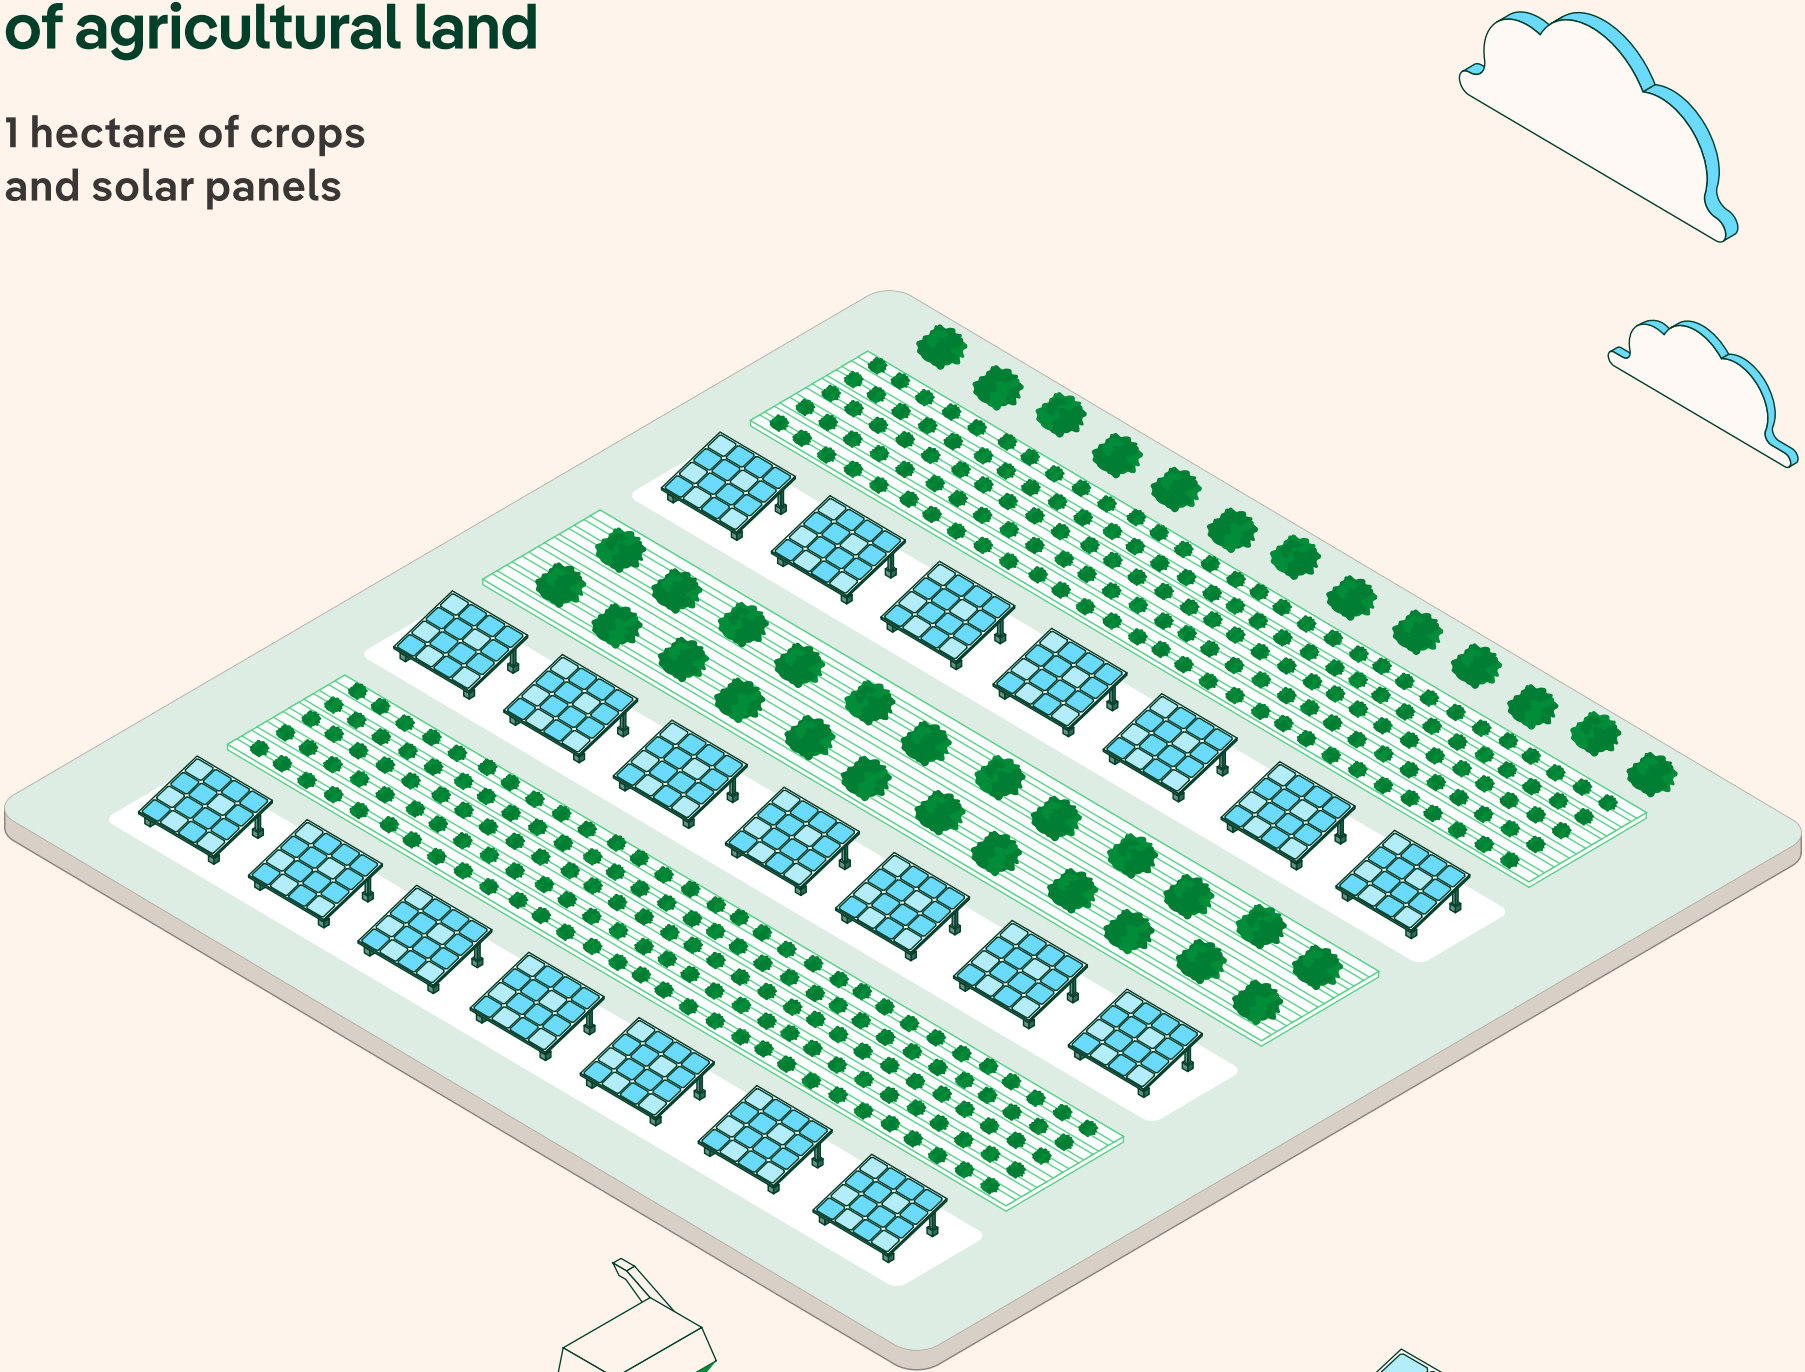

100%
agricultural product

100%
solar electricity

Combined use of agricultural land

1 hectare of crops
and solar panels

103%
agricultural product

83%
solar electricity
