

# ADVANTAGES OF PHOTOVOLTAIC SOLAR ENERGY

## Inexhaustible and non-polluting

It does not consume fossil fuels and does not generate waste

## Universal scope

Can be obtained anywhere in the world 365 days a year

## Storable

Allows the installation of batteries to store surplus electricity

## Optimal for rural areas

A system suitable where power lines do not reach or are difficult to install

## Green jobs

Contributes to the creation of green jobs and local economic growth

## Modulable according to need

It can be produced in small generator installations and in large photovoltaic plants
