

Iberdrola will pay out at least €0.31 per share in final dividend

- Iberdrola will distribute among its shareholders at least €0.31 per share as a final dividend, according to the terms of the new edition of the Iberdrola Flexible Remuneration system communicated today by the company to the Spanish National Securities Market Commission (CNMV).
- This amount is in addition to the gross €0.18 per share already distributed last January as an interim dividend and the €0.005 per share of the participation dividend distributed after the Annual General Meeting.
- Total shareholder remuneration for 2022 amounts to EUR 0.495 gross per share, 10% more than in the previous year.
- Iberdrola thus continues to fulfil its commitment to increase the dividend in line with the evolution of its results.
- Specifically, Iberdrola shareholders have three options: to receive the amount corresponding to their final dividend - EUR 0.31 gross per share - directly in cash; to sell their allocation rights on the market; or to obtain new bonus shares in the group free of charge. These three options are not mutually exclusive and shareholders may choose one of the alternatives or combine them according to their preferences.

DIVIDEND CALENDAR
