

Video voice-over

Emma Robertson: “I’m a Business Management student at Glasgow Cali, and I’m working with the digital team on planning content and planning future posts. I wanted to try something new from uni, so having this work experience gaining skills that I wouldn’t have within uni has been really beneficial towards me. My best experience so far would be going to Madrid to visit the Iberdrola office. Meeting the Spanish digital and media team. That was a really good experience. The team have definitely been a massive part of developing my confidence within ScottishPower and something that I never had pre-placement. Gaining these skills and working with the team was definitely boosting my confidence. I’ve been offered many opportunities from this placement. Working with a Longannet project, attending wind farms, working with the studio it’s been a really good opportunity. The programme has definitely set me up for the future. I was so nervous leaving uni and my comfort. Having this placement and doing this placement has been one of the most beneficial things that I’ve ever done. 100% would recommend the programme. It gives you life skills and it really sets you up for your future career”.
