

# THE KEY FIGURES OF GLOBAL WARMING

Due to **mankind's activities**, in 2017 the **temperature of the planet** was already **1°C** higher than it was before the industrial revolution.

The **global sea level** has risen **20 cm** since 1880 and it is expected to rise an additional **30-122 cm** by 2100.

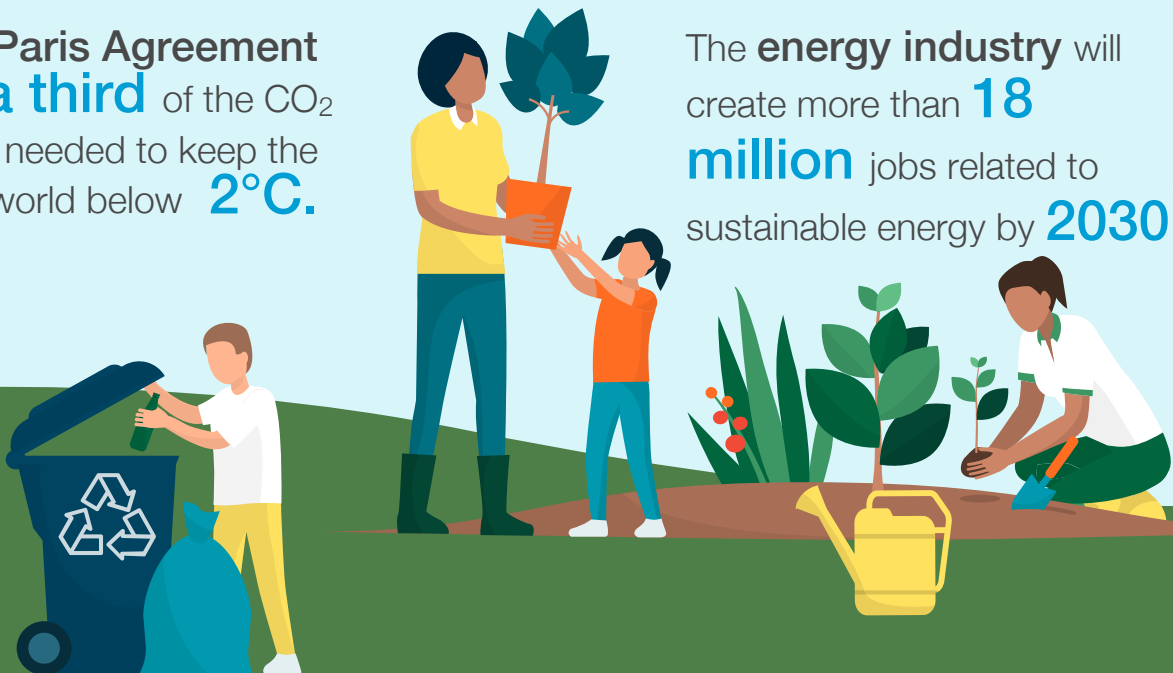

**Global CO<sub>2</sub> emissions** must be reduced to zero by **2050** to limit heating to **1.5 °C**.

A bold **climate action** could generate at least **26 billion** dollars in profits by **2030**.

The **Paris Agreement** covers **a third** of the CO<sub>2</sub> reductions needed to keep the world below **2°C**.

The **energy industry** will create more than **18 million** jobs related to sustainable energy by **2030**.
