

What steps do pet owners need to take in the post-Coronavirus world?

Remember that although some cases of COVID-19 have been detected in pets, **they do not transmit the disease to humans.**

Like humans, pets should also **avoid crowded places**, but they don't need to wear a mask.

If you have contracted COVID-19, try not to approach, hug or stroke your pet, and wear a mask to avoid spreading the disease.

Practice **good hygiene habits** with your pet and wash your hands after handling its food or waste.

If you have a cat, **try to keep it indoors** and **keep 2m away** from other people when walking your dog.

AND OF COURSE, NEVER ABANDON THEM!
