

THE OPPORTUNITIES AND CHALLENGES OF THE JUST TRANSITION

OPPORTUNITIES

Investments in sustainable production and consumption and natural resource management will produce a net increase in total employment.

The creation of more environmentally friendly products and services will bring about a **large-scale improvement in the quality of employment**.

Access to affordable and sustainable energy will promote the social inclusion especially important for women and people in rural areas.

CHALLENGES

Economic restructuring involves moving workers and loss of jobs, but also the creation of others through the transition.

The need for companies and communities **to adapt to climate change** to avoid the loss of resources and livelihoods.

The effects that adding the environmental sign to the prices of products has on **lower income households**.
