

How can we adapt mobility to today's society?

1 Reaffirm public transport as a reliable and safe option

Improve public transport routes and services and encourage their use with competitive journey times and fares.

2 Encourage rational use of private vehicles, taxis and shared vehicles

Implement taxi and car-sharing services that reduce the need for private vehicle ownership.

3 Redistribute public spaces to prioritise active mobility

Encourage a reduction in the number of motorised journeys in order to dedicate more space to cycling and pedestrians.

4 Change working and shopping habits

Providing more flexible work time-management options will help decongest traffic on the routes travelled.

5 Use technology to manage and schedule mobility

Apps can help the public find the best routes, avoid traffic congestion and use safer payment methods.
