

BASIC TIPS TO MAKE SURE YOUR AIR-CONDITIONING SYSTEM IS IN PERFECT ORDER

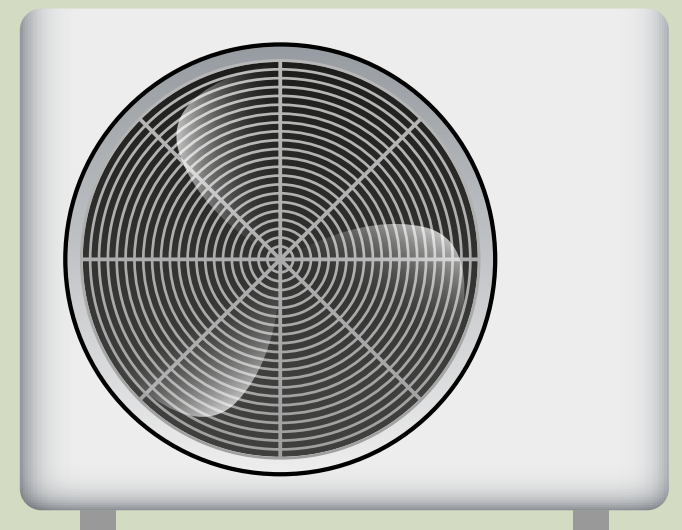

INDOOR UNIT

- 1 CHECK AND CLEAN THE FILTERS**
At what intervals?
Once a year in the case of conventional air-conditioning systems.
Every six months for systems with a heat pump.
- 2 CHECK AND CLEAN THE DRAIN OF THE UNIT INSIDE THE HOUSE**
This will help you prevent bad smells and clogging the drain.

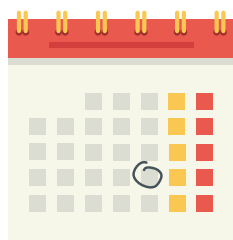

OUTDOOR UNIT

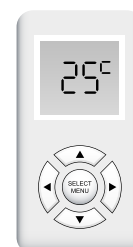

- 3 CLEAN THE AREA OF THE COMPRESSOR**
How to do it?
Using pressurised air equipment or with a brush.
- 4 CHECK AND CLEAN THE CONDENSER**
At what intervals?
Four times a year, after the end of each season.

IN ADDITION, THE FOLLOWING IS RECOMMENDED:

Perform an inspection of the unit once a year.

Check the condition of the batteries in the remote control.
