

The impact of the Internet of Things on some industries

ELECTRICITY

- Plant automation
- Checking of the condition of equipment
- Maintenance of sustainable environments

TRANSPORT

- Real-time management of orders and shipments
- Automated vehicle tracking
- On-demand inventory management

GAS AND OIL

- Measurement of crude oil extraction ratios
- Connected oil and gas pipelines
- Remote asset monitoring and management

WATER

- Water flow controllers
- Waste water treatment
- Smart consumption management

HOSPITALITY

- Room automation
- Improvements in room service
- Integration between resorts
