

Social Networks

be careful of what you share

Social networks allow sharing moments, contacting our friends and even staying up to date, but **if you do not take a series of precautions all that public information can turn against you.**

Follow our advice and
use them safely:

01

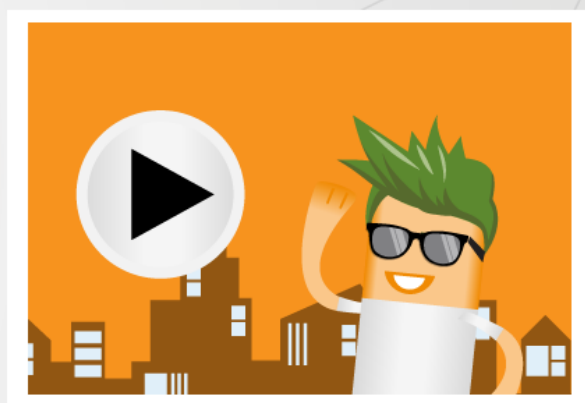

Protect them with **strong passwords** and do not share them with anyone.

02

Accept **requests from acquaintances only.**

03

Set up privacy and decide who can see your posts.

04

Do not share **personal information** with just anyone.

05

Avoid publications that could damage **your reputation.**

06

Be suspicious of publications with **ads, sweepstakes and irresistible offers.**

07

Beware of messages that contain **links.**
