

HOW TO IMPROVE CONDITIONS FOR POLLINATORS?

1. MORE POLLINATORS

Improve honey bee breeding and develop other species of pollinators.

2. MORE CONSERVATION POLICIES

Prevent infections, treat illnesses and regulate the pollinator trade.

3. PREPARING LAND

Use ditches and the borders of fields to grow diverse plants which flower for long periods.

4. IMPROVEMENT OF URBAN SPACES

Manage rights of way and wasteland in cities to support pollinators.

5. EDUCATIONAL MEASURES

Educate farmers about pollination and reward the use of methods that are innocuous to pollinators.

6. SUSTAINABLE CROPS

Reduce pesticide use and support approaches based on subsistence.

7. SOCIAL OUTREACH

Quantify and draise public awareness of the many benefits of managing pollinators.
