

Voice-over of the video 'A day at work with... Javi in Cañoneras'

Javi: 'Good morning, 6:15 in the morning and before going to Cañoneras you have to take care of the little dog'.

'6:50 in the morning, and we're at Cañoneras. As you can see there's a bit of fog and there in the background is the farm's substation. We'll go into the office and check how all the wind turbines are. They're all green to go. We'll get ready so that once the maintenance staff arrives, we can plan the work on the wind farm. So today we're going to do preventive work on wind turbine XVII'.

'I'm now prepping to reset the wind turbine. We'll go into the turbine. And this is the Cañoneras wind farm, with 38 generators, located in the east of the Cantabrian Mountains, in the municipality of Soba, in the province of Cantabria, and we are at an altitude of around 1,280 metres'.
