

How to stimulate children when learning from home

Talk to your children and help them with their timetables and homework. 

 **Set weekly goals** with your children and encourage them to celebrate their achievements.

Remember to take care of their **social and emotional needs**. 

 **Build a good learning atmosphere** based on family support and encourage siblings to help one another.

Encourage your children to engage in things that interest them to help **tailor their learning**. 

 **Get your children to share their thoughts** and challenge their ideas with questions and answers.

Assess their progress constructively so as to address learning difficulties and **help them to develop their strengths**. 

 Make sure they take breaks during learning hours and **give them time to play** and have fun.

 **Get involved in their education** by playing your part in the learning process and fostering creativity.
