

HAVE YOU HEARD ABOUT THE WATER FOOTPRINT?

It is defined as the amount of fresh water used to produce the goods and services consumed by the citizens of a country, by industry or individuals, which represents a much higher indirect consumption than we would ever imagine.

 From 1 to 50 litres  From 100 to 150 litres  More than 1,000 litres

6,700 litres per day
average water footprint
per Spanish citizen
