Keys facts for understanding world poverty

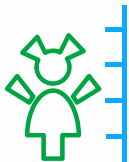

Global impact

719 million people are currently living in extreme poverty.

< 2.15 \$/day

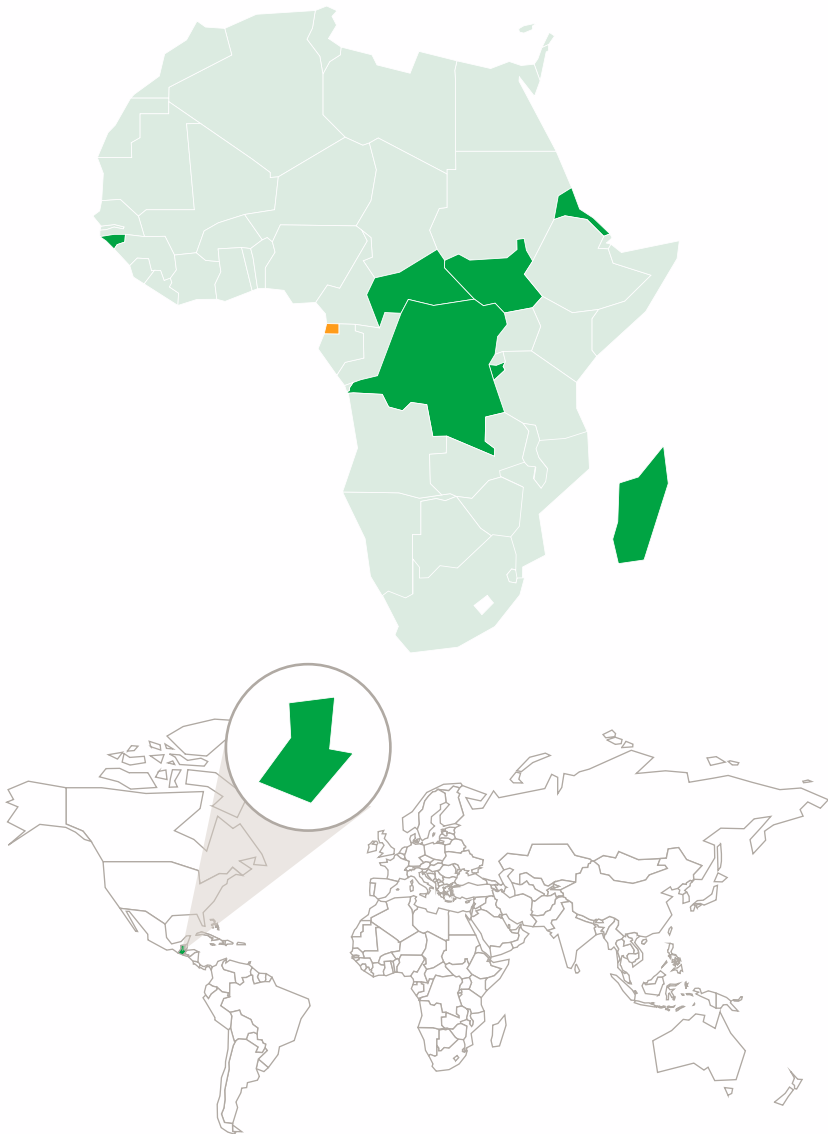

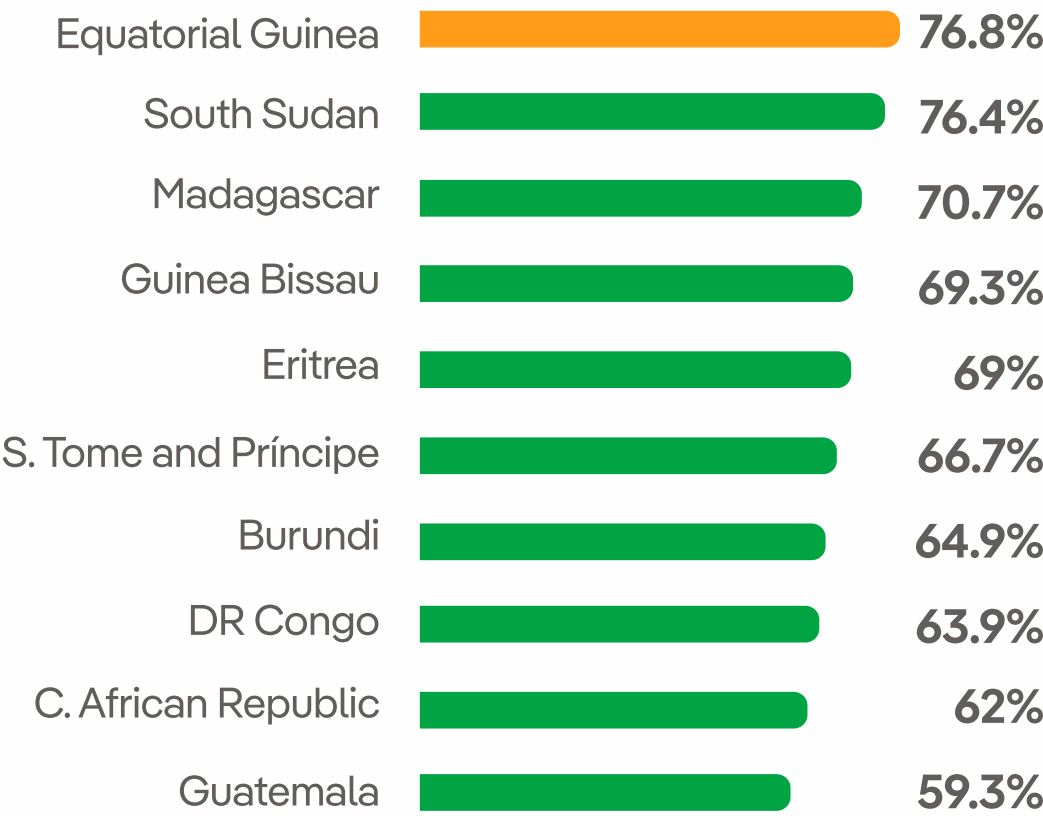

Specifically, they have to survive on less than 2.15 \$ a day.

+50% are children

One in four children under the age of five are under the appropriate height for their age.

The 10 countries with the highest percentage of poverty

Main causes

Unemployment, social exclusion and increased vulnerability of certain populations to natural disasters and disease.

Is there a solution?

Even though poverty has been halved since the year 2000, we need to focus on increasing the incomes and alleviate the suffering of the most vulnerable.
