Keys to understanding peace and justice in the world

Displaced persons

108.4 million people are forcibly displaced from their homes, fleeing war, persecution or natural disasters.

Killings of civilians

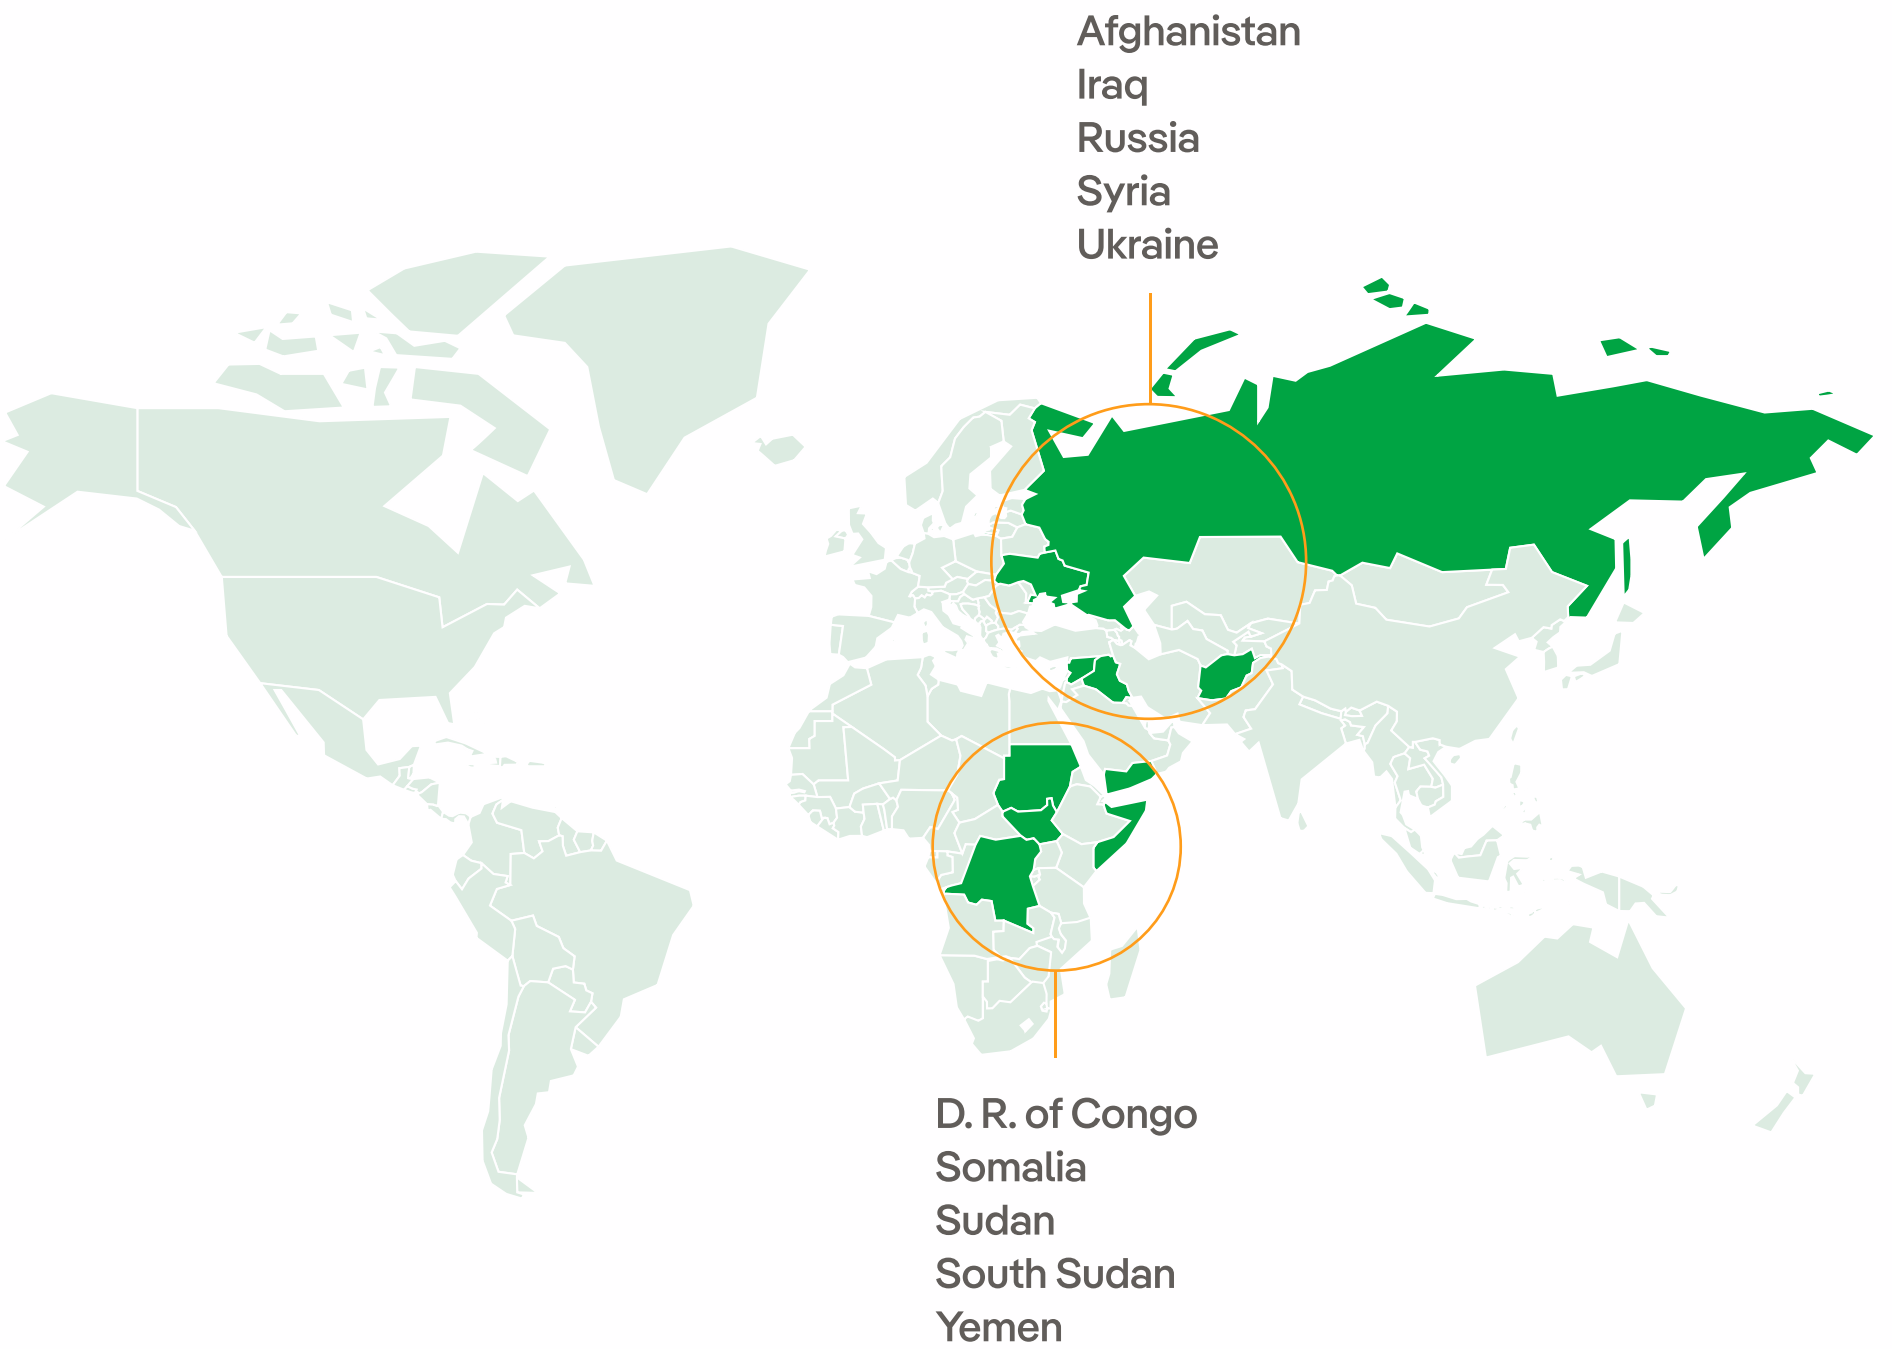

Civilian deaths in armed conflict increase by 53% in 2022, an unprecedented rise to nearly 17,000 casualties.

Prison overcrowding

More than 30% of the world's prisoners (11.2 million) are held without a conviction.

Least peaceful countries

Main causes

Religious conflicts, the political and economic interests of countries, social and economic inequalities - which give rise to political extremism, conflict and violence - and the support of certain organisations and countries for the arms industry.

How can we advance peace and justice?

We need to strengthen the rule of law and human rights and reduce the flow of illicit arms. We need to help developing countries increase their exports and boost fair, open and mutually beneficial international trade.
