

# What will society be like in 2030?

## MOBILITY

Los viajes serán en **coches eléctricos** compartidos equipados con **algoritmos** que optimizarán la ruta para reducir el consumo.

## FOOD

We will eat **more fruit and vegetables** and less meat, fish and dairy products.

## CONSUMPTION

**Single-use plastics** will have disappeared and buying sustainable products **in bulk** will increase.

## URBAN PLANNING

We will live in houses powered by **renewable energy** and **urban vegetable** gardens will be found on rooftops and in the streets.

## AGRICULTURE

The reduction in livestock farming will have a positive effect on **reforestation** and will **free up more land** for the cultivation of food.
