

How to apply the four pillars of the Flipped Classroom methodology?

F

Flexible environment

- Allow students to interact and reflect on their **learning needs**.
- Continuously observe and **monitor** students to make appropriate adjustments.

L

Learning culture

- Give students the opportunity to participate in activities without the teacher being the **focus of learning**.
- Establish activities and make them **accessible** to students through differentiation and feedback.

I

Intentional content

- Simplify and facilitate students' access to the **concepts** used during learning.
- Create and/or select relevant content, usually in **video format**, for students.

P

Professional educator

- Be **available** to students, both individually and collectively, and give feedback in real time.
- Conduct **ongoing formative assessments** during class time through observation and recording.
