Shareholder's bulletin  
Nine months  
/October 2019

Net profit grew by 20.4%, reaching 2,517 million as a result of the 30% increase in investments (Euro 4,727 million)
Chairman highlights

Ignacio Galán
Chairman & CEO of Iberdrola

“Acceleration of investments, which grew by 30%, together with good business results, have allowed Iberdrola to increase its net profits by 20.4% to 2,517 million, confirming the trend previously noted during the first half of the year.

Due to these positive results, the company has confirmed its growth prospects for the end of the year, which has allowed the Board of Directors to increase the interim dividend for 2019 by 10.6%, to 0.167 Euros per share.”
Shareholder returns

Iberdrola shareholder Remuneration “Iberdrola Retribución Flexible”
The solid results achieved during the nine months of 2019 will allow Iberdrola to reassert its double-digit growth in net profit in 2019.

Iberdrola increases interim dividend by 10.6%
This has allowed the Board of Directors to fix the gross amount of the Interim Dividend per share at a minimum of 0.167 Euros (10.6% higher than the final Interim Dividend submitted in 2018). To this amount will be added the Complementary Dividend, once approved at the General Shareholders’ Meeting (to be paid in July 2020).

As usual, this remuneration will be carried out through the scrip dividend “Iberdrola Remuneración Flexible” system, through which Iberdrola’s shareholders can choose between the following options (or combine them, if the value of the remuneration to be received is the same):

A. Receive free newly issued shares;
B. Receive cash by selling all of a portion of the free allocation rights in the market;

Calendar January 2020

Closing prices considered for determining the average price used to calculate number of rights and interim dividend amount

27, 30 & 31 December and 2 & 3 January

23 January

- Last day of rights trading period and of the common election period

5 February

- Delivery of shares
- Payment of interim dividend

7 February

Commencement of the trading of the newly issued shares

Maintaining the number of shares
Furthermore, and to avoid diluting shareholders, Iberdrola will honour its commitment to keep the number of shares at 6,240 million. Accordingly, on 28 June 2019 the 280,457,000 shares necessary to honour this commitment were redeemed (4.30% of capital).

Sustainable remuneration
Iberdrola has a dividend policy which has set a sustainable remuneration level, in anticipation of growth in the minimum annual dividend (floor) until it reaches at least 0.40 Euros per share in 2022, which is an increase of 23% on 2017.

**Highlights of the period**

**Net profit increased up 20.4%**

Iberdrola’s net profit grew by 20.4% at the end of the nine-month period, rising to Euro 2,517 million. The tax rate returned to more standard levels (24%).

![Net Profit chart](https://via.placeholder.com/150)

**The Operating Profit (EBITDA) grew by 11.6%**

The operating profit (EBITDA) for the nine-month period in 2019 reached Euro 7,499 million (+11.6%) thanks to the healthy performance of the Networks and Generation and Clients businesses, and despite the difficult hydraulic conditions in Spain.

The EBITDA of the Networks business grew by 8.2% to Euro 3,942 million, boosted by improvements to the business in Brazil, the USA and the United Kingdom. With regard to Renewables, the EBITDA was around Euro 1,678.3 million, falling slightly as a result of a decrease in output, which reached 35,858.0 GWh (-10.9%). This was due to lower levels of hydraulic activity in Spain, and was in spite of the additional capacity installed in Mexico, Brazil and the USA. The EBITDA for Generation and Clients improved by 18.6% to Euro 1,817.7 million, principally due to improved performance in Spain and Mexico, which compensated the lower output in sales of thermal generation assets and the price cap in the United Kingdom.

**Acceleration in investments rising to Euro 4,727 million**

Investments made over the period, rising by 30% year-on-year and reaching Euro 4,727 million. These investments were concentrated on the Networks and Renewables Business, in line with the Group’s strategy, with 87% of the total annual investment concentrated in these two businesses.

With regard to the Renewable business, the Euro 1,104.7 million invested in four new onshore wind farms in the United States are of particular note, as are the new solar and wind developments in Spain, and the offshore wind projects in the United Kingdom.

In line with the investment plan, 5.2GW of new generating capacity will be added, 11% only during 2019, reaching 13,000 MW of capacity in 2022.

www.iberdrola.com
Highlights of the period

Financial strength

The increase in operating cash flow and the asset turnover plan led to an improvement in financial ratios. Thus the ratio of cash flow generation (FFO) to net debt improved, reaching 22.2%, with the cost of the debt falling by two basis points. Financial leverage, meanwhile, also improved, falling to 43.2%.

Operational Excellence

In line with what was estimated in our strategy, which has operational efficiency as one of its pillars, efficiency continued to improve during the last quarter. As a result, net operating costs rose by 2.1%, with an increase of 6.6% in the gross margin. As a consequence, the ratio of net operating costs/gross margin improved by 120 basis points on the previous year to 26.1%, thus reaching the goal for 2022.

Asset rotation plan

In terms of asset rotation, in this quarter operations were completed with a value exceeding Euro 2,000 million, mainly through:

- The sale of a minority holding of 40% in our offshore wind project, East Anglia One, in the United Kingdom for around Euro 1,700 million.
- The long-term distribution of rights in relation to the fibre optic network in Spain for Euro 300 million.

These operations, together with others that were carried out during the first half of the year, represented a total value of Euro 3,500 million, thus meeting the goals of the efficiency and asset turnover plans set for 2022, more than three years early.

By December, we hope to have put 7,000MW into operation in just two years, which represents over 50% of the five-year plan.
The positive results of the past nine months demonstrate the benefits linked to the model the company has been using for the past twenty years, and which is now more valid than ever. Based on the opportunities derived from the transition to clean energy, a process in which we have played a leading role, the Group is accelerating its investments in Networks, Renewables and Storage. The efficiency and asset turnover plans are also ahead of what was initially forecast, with both having already reached their goals for 2022. This was demonstrated by the increase of 120 basis points in the ratio of net operating costs/gross margin which rose to 26.1%, while the goal of Euro 3,500 million in asset turnover was also reached. This provides an additional margin for new investments, creating a virtuous circle that we hope will continue to accelerate and, as a result, boost the company’s future results.

Important information
This document does not constitute an offer or invitation to purchase or subscribe shares, in accordance with the provisions of (i) the restated text of the Securities Market Law approved by Royal Legislative Decree 4/2015, of 23 October; (ii) Regulation (EU) 2017/1129 of the European Parliament and of the Council, of 14 June 2017, on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC; (iii) Royal Decree-Law 5/2005, of 11 March; (iv) Royal Decree 1310/2005, of 4 November, and (v) their implementing regulations.
In addition, this document does not constitute an offer of purchase, sale or exchange, nor a request for an offer of purchase, sale or exchange of securities, nor a request for any vote or approval in any other jurisdiction.

The shares of Iberdrola, S.A. may not be offered or sold in the United States of America except pursuant to an effective registration statement under the Securities Act of 1933 or pursuant to a valid exemption from registration. The shares of Iberdrola, S.A. may not be offered or sold in Brazil except under the registration of Iberdrola, S.A. as a foreign issuer of listed securities, and a registration of a public offering of depositary receipts of its shares, pursuant to the Capital Markets Act of 1976 (Federal Law No. 6,385 of December 7, 1976, as further amended), or pursuant to a valid exemption from registration of the offering.

This document and the information presented herein was prepared by Iberdrola, S.A. solely with respect to the consolidated financial results of Iberdrola, S.A. and was prepared and is presented in accordance with the International Financial Reporting Standards ("IFRS"). This document does not contain, and the information presented herein does not constitute, an earnings release or statement of earnings of Avangrid, Inc. ("Avangrid") or Avangrid's financial results. Neither Avangrid nor its subsidiaries assume responsibility for the information presented herein, which was not prepared and is not presented in accordance with United States Generally Accepted Accounting Principles ("U.S. GAAP"), which differs from IFRS in a number of significant respects. IFRS financial results are not indicative of U.S. GAAP financial results and should not be used as an alternative to, or a basis for anticipating or estimating, Avangrid's financial results. For information regarding Avangrid's financial results for the nine-month period ended on 30 September 2019, please see the press release Avangrid issued on October 29, 2019, which is available on its investor relations website at www.avangrid.com and the Securities and Exchange Commission ("SEC") website at www.sec.gov.

In addition to the financial information prepared under IFRS, this presentation includes certain alternative performance measures ("APMs"), as defined in the Guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority on 5 October 2015 (ESMA/2015/455es). The APMs are performance measures that have been calculated using the financial information from Iberdrola, S.A. and the companies within its group, but that are not defined or detailed in the applicable financial information framework. These APMs are being used to allow for a better understanding of the financial performance of Iberdrola, S.A. but should be considered only as additional information and in no case as a substitute of the financial information prepared under IFRS. Moreover, the way Iberdrola, S.A. defines and calculates these APMs may differ from the way these are calculated by other companies that use similar measures, and therefore they may not be comparable. Finally, please consider that certain of the APMs used in this presentation have not been audited. Please refer to this presentation and to the corporate website (www.iberdrola.com) for further details of these matters, including their definition or a reconciliation between any applicable management indicators and the financial data presented in the consolidated financial statements prepared under IFRS.

This document does not contain, and the information presented herein does not constitute, an earnings release or statement of earnings of Neoenergia S.A. ("Neoenergia") or Neoenergia's financial results. Neither Neoenergia nor its subsidiaries assume responsibility for the information presented herein. For information regarding Neoenergia's financial results for the nine-month period ended on 30 September 2019, please see the press release Neoenergia issued on October 18, 2019, which is available on its investor relations website at www.ni.neoenergia.com and the Brazilian Comissão de Valores Mobiliários ("CVM") website at www.cvm.qpv.br.

Forward-looking statements
This communication contains forward-looking information and statements about Iberdrola, S.A., including financial projections and estimates and their underlying assumptions, statements regarding future plans, objectives and expectations with respect to future operations, capital expenditures, synergies, products and services, and statements regarding future performance. Forward-looking statements are statements that are not historical facts and are generally identified by the words "expects," "anticipates," "believes," "intends," "estimates" and similar expressions.
Although Iberdrola, S.A. believes that the expectations reflected in such forward-looking statements are reasonable, investors and holders of Iberdrola, S.A. shares are cautioned that forward-looking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of Iberdrola, S.A., that could cause actual results and developments to differ materially from those expressed in, or implied by, or projected in the forward-looking information and statements. These risks and uncertainties include those discussed or identified in the documents sent by Iberdrola, S.A. to the Spanish Comisión Nacional del Mercado de Valores, which are accessible to the public.
Forward-looking statements are not guarantees of future performance. They have not been reviewed by the auditors of Iberdrola, S.A. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date they were made. All subsequent oral or written forward-looking statements attributable to Iberdrola, S.A. or any of its members, directors, officers, employees or any persons acting on its behalf are expressly qualified in their entirety by the cautionary statement above. All forward-looking statements included herein are based on information available to Iberdrola, S.A. on the date hereof. Except as required by applicable law, Iberdrola, S.A. does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
