

General Shareholders' Meeting

2 April 2020

Report of the Board of Directors

Proposed increases in capital by means
of scrip issues of the “Iberdrola Flexible
Remuneration” optional dividend system

the implementation of the Increase in Capital submitted for approval of the shareholders at the General Shareholders' Meeting under item number thirteen on the agenda, together with the payment of the Supplementary Dividend.

- (ii) The second implementation of the "Iberdrola Flexible Remuneration" optional dividend system for financial year 2020 (the "**Second Implementation**", and collectively with the First Implementation, the "**Implementations**" and each of the Implementations, individually, an "**Implementation**") shall be carried out through the implementation of the Increase in Capital submitted for approval of the shareholders at the General Shareholders' Meeting under item number fourteen on the agenda together with the payment of the Interim Dividend, to the extent that the requirements set out in section 277 of the *Companies Act* are met. The Purchase Commitment would be implemented if said requirements are not met.

It is expected that the First Implementation will take place in the month of July 2020 and that the Second Implementation will occur in the month of January 2021.

In each of the Implementations, the shareholders may choose from among the following options for remuneration upon the terms and conditions established by the Board of Directors (with express power of substitution):

- (a) Receiving their remuneration in cash by collecting the Dividend in question (whether with respect to all of their shares or a portion thereof), for which purpose the shareholders shall be required to make an express election in this regard.
- (b) Receiving their remuneration in newly-issued bonus shares of the Company. To this end, shareholders must refrain from transferring their free-of-charge allocation rights on the market. In this case, upon completion of the trading period for the free-of-charge allocation rights and implementation of the Increase in Capital, the shareholders shall receive such number of new shares (as they are proportionately entitled to receive), entirely as bonus shares.
- (c) Transferring all or part of their free-of-charge allocation rights on the market during the trading period pursuant to the provisions of section 3.2 below. In this case, the consideration for such rights will depend on market conditions in general and on the listing price of such rights in particular.

The shareholders may only elect remuneration option (a) above during the "**Common Election Period**". The Common Election Period will begin on the same day as the trading period for the free-of-charge allocation rights, and the Board of Directors (with express power of substitution) must establish the specific term of the Common Election Period, which may in no event exceed the term of said trading period.

Based on their preferences and needs, the Company's shareholders may combine any of the alternatives mentioned in paragraphs (a) through (c) above with respect to different groups of shares that each of them own. In any event, the election of one of the remuneration options automatically excludes the ability to choose either of the other two options regarding the same shares.

Furthermore, as already mentioned, if the requirements of section 277 of the *Companies Act* are not met on occasion of the Second Implementation, and therefore the Company cannot distribute the Interim Dividend, the shareholders may monetise their free-of-charge allocation rights by transferring them to the Company at the Fixed Purchase Price within the framework of

the Purchase Commitment and thus receive a cash amount equal to the one that the Company would have distributed as payment of the Interim Dividend.

In this regard, it should be borne in mind that the tax treatment of the above alternatives may be different, as described in section 3.7 below.

Iberdrola assumes no liability for the choices made by the holders of the free-of-charge allocation rights (or for a failure to choose, if an express and valid communication is not received from said holders).

3. Main Terms and Conditions of the Increases in Capital.

Set forth below are the main terms and conditions of the Increases in Capital.

3.1 Nominal Amount of the Increases in Capital, Number of Shares to Be Issued, and Number of Free-of-charge Allocation Rights Required for the Allocation of One New Share.

The amount of each of the Increases in Capital shall be the result of multiplying the nominal value of each share of the Company (seventy-five euro cents per share) by the total determinable number of new shares of the Company to be issued on the date of each of the Implementations. The Increases in Capital will thus be carried out at par (i.e. without a share premium).

In turn, the maximum number of new shares to be issued in each Increase in Capital shall be the number resulting from the application of the following formula (with the result being rounded to the next lower integer):

$$\text{NNS} = \text{TNShrs.} / \text{Num. rights}$$

where:

NNS = Maximum number of new shares to be issued;

TNShrs. = Number of shares of the Company outstanding on the date that the Board of Directors (or the body acting by delegation therefrom) resolves to implement each Increase in Capital. In this regard, those shares of the Company that have previously been retired by virtue of the implementation of the resolution approving the reduction in share capital by means of the retirement of own shares submitted to the shareholders for approval at the General Shareholders' Meeting under item number eight on the agenda, even if the corresponding public instrument formalising the implementation of the resolution approving the reduction in capital has not been executed or is pending registration with the Commercial Registry, shall not be deemed to be outstanding shares of the Company; and

Num. rights = Number of free-of-charge allocation rights required for the allocation of one new share in the Increase in Capital in question, which number will result from the application of the following formula, rounded to the next higher integer:

$$\text{Num. rights} = \text{TNShrs.} / \text{Provisional number of shares}$$

where:

$$\text{Provisional number of shares} = \text{Amount of the Option} / \text{ListPri}$$
