

# 2021 General Shareholders' Meeting

## Sustainable Event

The 2021 General Shareholders' Meeting was held by remote means, but it **was no less sustainable for that reason**. Below you can find the four guidelines driving our efforts in making our events more sustainable, as well as some of the actions we perform:

### Improving accessibility to events

- Multi-language
- Live broadcast
- Sign language
- Audio-description

### Minimising the environmental impact of events

- Waste segregation and recovery
- Green purchasing criteria
- Emissions offset project
- Re-use of materials
- 100 % renewable energy

### Increasing awareness in the area of sustainability

- Acting as driving force on main suppliers
- Encouraging remote participation
- Analysis and communication of the environmental impact of events

### Helping the local community

- Favouring the entry of young people into the job market, facilitating their first professional experience

**Now, more than ever before,  
let us be sustainable**
