Iberdrola achieves adjusted net profit of €1,844 million (+8.4%) in the first half of the year.
Chairman’s key points

"These results have come about through an unprecedented investment effort. In a very challenging period, we have accelerated investment in networks, renewables and storage, promoting economic activity and helping to create quality jobs around the world."
Shareholder remuneration in 2021

Iberdrola increases shareholder remuneration by 5.5%

Among the resolutions adopted at the last 2021 General Meeting, item 17 on the agenda was approved with 99.17% of votes in favor, corresponding to shareholder remuneration to be charged to 2020 and paid in 2021. Therefore, the minimum total shareholder remuneration was set at €0.42 gross per share.

Of this amount, €0.168 gross per share was already distributed in the form of an interim dividend last February. €0.254 gross euros per share will be paid in July (9.5% more than the final dividend paid in 2020).

Therefore, the total shareholder remuneration paid in 2021 against 2020 results will be €0.422 gross per share, an increase of 5.5% compared to the 2020 remuneration.

The “Iberdrola Remuneración Flexible” system allows shareholders to choose or combine three options for the payment of the dividend, which in this latest edition of July 2021 were as follows:

1. Receive one new Iberdrola share free of charge for every 40 free-of-charge allocation rights.
2. Receive cash by selling their free-of-charge allocation rights on the market.
3. Receive cash through the payment of the final dividend of €0.254 gross per share.

En este sentido, durante la pasada Junta de Accionistas se aprobó la amortización de acciones necesaria para cumplir este objetivo, que asciende a 178.156.000 acciones y se corresponde con el 2,78% del capital, y que se llevó a cabo el 2 de julio de 2021.

Dividend policy

On 5 November, as part of its Capital Markets Day 2020, Iberdrola updated its dividend policy, highlighting the following points:

- Dividend growth in line with the company’s results, establishing the pay-out on net earnings per share between 65% and 75%.
- Dividend floor for the period 2020-2022 of €0.40 per share, while for the period 2023-2025, this floor will be increased by 10% to €0.44 gross per share.
- Shareholder optionality is maintained through the “Iberdrola Flexible Remuneration” programme, including share buybacks.

For the financial year 2021, the dividend per share (DPS) is expected to amount to €0.44 gross.
Highlights of the period

El EBITDA crece un 10%

Iberdrola’s EBITDA in the first half of 2021 increased by 10% to €5,444 million. It was impacted by the COVID effect and the impact of the reversal of the hydroelectric levy in Spain in 2013 and 2014.

By businesses, the reported EBITDA of the Networks business increased by 10.6% to €2,567.9 million, driven by the solid operating performance in all countries thanks to the regulatory frameworks and higher investments.

Renewables increased 63.0% to €2,005.2 million, driven by the contribution of the new assets in operation and the higher output from existing assets due to improved availability and load factors.

The Generation and Supply business achieved a reported EBITDA of €808.3 million.

Record investments of Eur 4,909 million

Gross investments continued to accelerate, growing 37% to reach a record half-year figure of €4,909 million.

By business, 45% of the total was invested in the renewable business, with more than 8,500 MW already under construction, and 46% of the total in the networks business, in line with the plan.

In the first half of the year, Iberdrola has 80% of the capacity planned for 2025 under construction or ready for construction: 2,894 MW onshore wind, 6,570 MW offshore wind, 10,894 MW photovoltaic, 1,200 MW hydro and 391 MW in batteries.

This investment plan is the result of the constant effort to develop a diversified and quality portfolio of projects as the main backbone for future growth.
Improvement in key credit metrics

The Group’s solid operating performance is fully reflected in cash flow generation, which reached €4,246 million in the first half of the year.

As a result, financial ratios improved, notably “FFO/adjusted net debt” increased by 160 basis points to 23.6%.

The Group has adequate and diversified liquidity amounting to €17.6 billion and covers 21 months of financing needs. It is a leader in green financing.

Adjusted net debt fell to €36.58 billion.

Net profit reached Eur 1,844.4 million

Reported net profit amounted to €1,531.3 million.

Stripping out extraordinary effects (COVID-19, deferred taxes in the UK and reversal of the hydroelectric levy in Spain), adjusted net profit at the end of the first half amounted to €1,844.4 million (+8.4%).

Sustainability: a business model in line with best practices

- All our coal and fuel oil plants closed
- Emissions of 43 g/kWh, in the first half of 2021
- Zero emissions by 2030, 20 years ahead of EU target
- Largest corporate issuer of green bonds worldwide
- Pioneer in implementing TFCD recommendations

ENVIRONMENT

SOCIAL

- Record purchases awarded since beginning 2020: Eur 18 Bn
- Supporting 400,000 jobs globally
- 6,000 new hires since January 2020
- >50 hours of training per employee

GOVERNANCE

- Governance and Sustainability system internationally recognized
- Reflecting best practices in Diversity & Inclusion
- Climate Action Plan included in By-laws
Involvement of shareholders

The General Shareholders’ Meeting took place on 18 June 2021. For the second year and due to the health situation, it was held remotely.

Iberdrola has been committed for years to strengthening dialogue with its more than 600,000 shareholders and to achieving their maximum involvement in the most significant decisions of the Company. To achieve this, digitalisation has been a key tool that has made it possible to introduce innovations and constant improvements.

Iberdrola was the first first Ibex 35 company to allow its shareholders to exercise their voting and proxy rights using a QR code, therefore establishing direct interaction between the shareholder and the company.

Climate Action Plan

Thanks to the support received, Iberdrola has become the first energy company in Spain to include its commitment to the fight against climate change in its Bylaws, adding the obligation to have a Climate Action Plan. This agenda item received the support of 97% of the quorum and the Company is particularly proud of the involvement of shareholders on this issue.

Massive support for the Group’s management

All the proposed blocks of agreements have been endorsed with an affirmative vote of more than 90%. By theme, these are the percentages of support received:

- Management results: 98.52%
- Governance and sustainability system: 98.48%
- Shareholder remuneration: 99.49%
- Board of Directors: 94.23%
- Authorisations and delegation of powers: 99.68%
- Consultative votes: 91.67%
