

Iberdrola launches its International Master's Scholarship Programme

- *The call is for graduates and final-year university students who will be able to choose from around twenty top universities.*
- *Participants can do an internship in the company and apply for one of the Group's vacancies around the world.*

Today Iberdrola opens a new call for applications for its [Master's scholarships for the 2025–2026 academic year](#). Their goal is to promote excellence in the education of the new generations and to foster young talent. The company offers new generations the opportunity to train in activities related to electrification and renewable energy. It is undoubtedly an opportunity for development for society and for the health of the planet itself.

The Iberdrola International Scholarship Programme is aimed at graduates and university seniors. It will have a total investment of €1,200,336.

Through this initiative, the company aims to promote the professional qualification of young people in the field of energy, with special emphasis on areas of knowledge such as engineering, renewable energies, information technologies, sustainability, and big data.

Applicants will be able to choose from around twenty top universities or technological institutes. These institutions include the University of Edinburgh, the University of Strathclyde and Imperial College of London in the UK, the Universidad Pontificia de Comillas and the Polytechnic Universities of Madrid, Valencia and the Basque Country in Spain, among others.

The registration process for this new call for applications began on Wednesday and will remain open until **4 April**. Those interested can read through all the conditions on Iberdrola's corporate website and fill in the application form in the 'Work with us' section

When selecting candidates, other factors such as CV, interest in the study project and letters of reference will be taken into account in addition to academic record and language skills.

To date, nearly 1,000 young people have already had the opportunity to boost their professional careers by pursuing master's and postgraduate studies and conducting research at prestigious international centres with the support of the Iberdrola Group. This year's scholarships will be awarded to students of Engineering, Computer Science, Mathematics, Big Data, Cybersecurity, Information and Communication Technologies, Business Administration and Digital Marketing.

Supporting a new generation with top skills

The Iberdrola International Master's Scholarship Programme promotes a generation of professionals with top skills to prepare for and face the challenges of a green future, including the development of a sustainable energy model. This initiative also promotes the employability of young people in a sector that will generate thousands of new jobs in the future, linked to the energy transition and digital transformation.

Once they have completed their studies, participants in this call for applications will have the opportunity to carry out internships at the company and to apply for vacancies published by the Iberdrola Group related to their profile.
