

# Ten challenges for the food of the future

- 1 Improve sustainably **agricultural productivity** to satisfy growing demand.
- 2 Guarantee supplies of natural resources through **sustainable use**.
- 3 Grasp opportunities, obtain revenue and tackle the **causes of migration from rural areas**.
- 4 Prevent **emerging and transborder threats** to agriculture and food systems.
- 5 Create more efficient, inclusive and resilient **food systems**.
- 6 Erradicate extreme poverty and **reduce inequality** to improve access to food.
- 7 End **food insecurity** and all forms of malnutrition.
- 8 **Increase resilience** to crises, disasters and prolonged conflicts.
- 9 Address the need for coherent, efficient **national and international governance**.
- 10 **Deal with climate change** and the intensification of natural disasters.
