## 2025 First half Results presentation: Ignacio S. Galán, Executive Chairman of Iberdrola

Ignacio S. Galán

Our first half results show a strong operating performance that we expect to improve even further into the rest of the year.

The equity rise launched today provides us further visibility and security in our long term growth outlook, and gives us a unique opportunity to accelerate our growth fully aligned with our strategy, focussed on networks in the US and the UK, reinforcing our value proposition based on the strong growth, sustained dividend increases, and financial strength.

Take care of the environment.  
Print in black and white and only if necessary.
