

Applications of BESS batteries

Front of the meter (FTM)

Public services

>10 MWh

- Storage and distribution of excess energy generated
- Price regulation
- Ancillary markets

Behind the meter (BTM)

Commerce and industry (C&I)

<10 MWh - > 30 kWh

- Adoption of photovoltaics for self-consumption
- Fast and uninterrupted power supply
- Energy cost savings
- Infrastructure for electric car charging points

Residential

< 30 kWh

- Adoption of photovoltaics for self-consumption
- Energy cost savings
- Infrastructure for electric car charging points
