

Iberdrola to distribute an interim dividend of €0.25 per share, a total payout of around €1.7B

- *Iberdrola will distribute a minimum of €0.25 per share in January as an interim dividend for 2025 results according to the terms of the new Iberdrola Retribución Flexible System announced today to the Spanish National Securities Market Commission (CNMV)*
- *The amount is 8.2% more than the €0.23 per share distributed for 2024*
- *A supplementary dividend will be added to this amount once approved at the General Shareholders' Meeting*
- *Iberdrola will allocate nearly €1.7B to the interim dividend alone, representing a double-digit increase over last year as the company has increased its number of shares by 300M following last July's capital increase*
- *This dividend reaffirms the dividend policy that the Group has been applying for more than 20 years*
- *Iberdrola shareholders have three options: receive new shares, collect the dividend in cash or sell the rights on the market. These three options are not mutually exclusive: shareholders can choose one or combine them as they like*

Preliminary calendar for the 2026 Iberdrola Retribución Flexible Programme
