

# Iberdrola recognised for the fifth consecutive year on CDP's "A List" for transparency and environmental management

- *The company has been acknowledged by this prestigious global organisation that runs the world's only independent environmental disclosure system*
- *This continued recognition underscores Iberdrola's commitment to a safer, cleaner, more resilient and competitive economy through electrification*

---

For the fifth year in a row, Iberdrola has achieved the highest possible rating on the "A List" prepared by CDP, the international organisation that assesses the transparency and environmental management of companies. This recognition reinforces the company's steadfast commitment to the highest standards of sustainability, as well as disclosure, transparency and performance in climate action.

Iberdrola's continued presence on this highly selective list—attained by only 4% of the more than 22,100 companies assessed globally—reflects its long-term strategic commitment to accelerating electrification as a pathway to a safer, cleaner, more resilient and competitive economy.

CDP is an international non-profit organisation that runs one of the world's leading independent environmental disclosure systems, used by companies, investors, cities, states and regions to measure and manage environmental impact. Each year, CDP evaluates organisations using a rigorous methodology that assesses the quality and completeness of disclosures, risk management practices and the implementation of best-in-class environmental and climate strategies. Its ratings, which range from A to D, are widely regarded as a global benchmark for investors and financial markets.

In addition, Neoenergia, the Brazilian subsidiary of the Iberdrola Group, has also been included on the "A List", receiving double recognition for excellence in both climate and water management.

## A world leader in sustainability

With this achievement, Iberdrola –Europe's largest electricity company by market capitalisation and the second largest globally– further strengthens its position as a global benchmark in transparency and sustainability. Beyond CDP's recognition, the company is consistently included in the world's leading sustainability indices, including Dow Jones Best-in-Class World and Europe (S&P), MSCI, Sustainalytics, ISS ESG, EcoVadis and FTSE4Good.

### About Iberdrola

With a market capitalisation of more than €125 billion, Iberdrola is the largest electricity company in Europe and one of the two largest in the world. The Group serves more than 100 million people worldwide and has a workforce of more than 46,000 employees and assets exceeding €160 billion. In 2024, Iberdrola recorded revenues of almost €50 billion and a net profit of €5.6 billion. The company contributes nearly €10.3 billion in taxes in the countries where it operates and supports more than 500,000 jobs among its suppliers thanks to purchases that exceeded €18 billion in 2024.

Since 2001, Iberdrola has invested more than €175 billion in electricity networks, renewable energies and energy storage to contribute to the creation of an energy model based on electrification. The company has nearly 1.4 million km of electricity networks in the United States (states of New York, Connecticut, Maine and Massachusetts), the United Kingdom (Scotland, England and Wales), Brazil (the states of Bahia, Rio Grande do Norte, Pernambuco, São Paulo and Mato Grosso do Sul, as well as Brasilia) and Spain, as well as 57,000 MW of capacity worldwide, of which more than 45,000 MW are renewable.
