

## Iberdrola, leader in the European market for long-term clean energy contracts for the third consecutive year

- *The company has topped the list of Power Purchase Agreement (PPA) sellers in the Pexapark Renewables Market Outlook 2026 report, with almost double the volume of the second-ranked company*
- *Globally the Group has signed electricity sales agreements for 400 TWh in Spain, the United States, the United Kingdom, Brazil, Germany, Australia, Portugal, Italy and Poland, among other countries*

---

Iberdrola leads the European market for long-term renewable energy purchase agreements, known as Power Purchase Agreements or PPAs, for the third consecutive year, according to the *Pexapark Renewables Market Outlook 2026* report.

This result is based on a strategy founded on a broad and diversified portfolio of renewable projects, which allows Iberdrola to offer clean energy at stable, competitive and long-term prices in a context marked by volatility in the energy markets.

The Group, which has extensive experience in the sector, manages PPAs in Spain, the United States, the United Kingdom, Brazil, Germany, Australia, Italy, Portugal and Poland, among others. The experience accumulated in these markets, as well as a portfolio that combines solar photovoltaic, onshore and offshore wind, hydroelectric and battery storage solutions, allows each contract to be tailored to the specific needs of customers. Its signed long-term electricity sales now total 400 TWh.

Iberdrola has strategic agreements with some of the world's largest multinationals, including Microsoft, Amazon, Apple, Telefónica, Mercedes-Benz, Heineken, Vodafone, Mercadona, AB InBev, Renault, Holcim and Salzgitter. It also collaborates with companies in key sectors such as technology, food distribution, telecommunications, metallurgy, automotive and transport, reflecting the growing demand for renewable energy from companies committed to decarbonisation and cost stability.

Through PPAs, Iberdrola provides industrial customers with access to 100% renewable energy at stable long-term prices, reducing emissions and advancing their climate goals. These agreements also contribute to improving business competitiveness and have become an essential pillar for driving electrification and the deployment of new renewable capacity in Europe.

**About Iberdrola**

With a market capitalisation of more than €125 billion, Iberdrola is the largest electricity company in Europe and one of the two largest worldwide. The Group serves more than 100 million people across the globe and has a workforce of over 46,000 employees and assets exceeding €160 billion. In 2024 Iberdrola recorded revenues of almost €50 billion and a net profit of €5.6 billion. The company contributes nearly €10.3 billion in taxes in the countries where it operates and supports more than 500,000 jobs among its suppliers thanks to purchases that exceeded €18 billion in 2024.

Since 2001 Iberdrola has invested more than €175 billion in electrical networks, renewable energies and energy storage to contribute to the creation of an energy model based on electrification. The company has nearly 1.4 million kilometres of electrical networks in the United States (states of New York, Connecticut, Maine and Massachusetts), the United Kingdom (Scotland, England and Wales), Brazil (the states of Bahia, Rio Grande do Norte, Pernambuco, São Paulo and Mato Grosso do Sul, as well as Brasília) and Spain, as well as 57,000 MW of capacity worldwide, of which more than 45,000 MW are renewable.
