

## We are making good progress on our roadmap

### Initiatives during the period

**Networks**  
Green light for NECEC (US-Canada). Iberdrola becomes a partner in VNI West (Australia).

**Renewables**  
Assembly begins on the wind turbines for Portugal's largest wind farm.

**Batteries**  
Two 60 MWh / 30 MW systems installed, the largest in Spain.

**Neoenergia's 'Electricity for all' programme** brings electricity to a fishing community for the first time.

**ScottishPower begins talks with communities for Western Link 2**, an underwater interconnection project between Scotland and Wales

**Carbon2Nature starts operation in Australia**, where it is working to restore 688 hectares of critical forest.

**Echelon Iberdrola Digital Infra is created** to invest more than €2 billion in data centres in Spain

### Group performance at the end of the period

**Reduction in emission intensity**  
39.2<sup>1</sup> gCO<sub>2</sub>/kWh >> Carbon neutrality in electricity generation.

**Smart grids (% of asset automation)**  
85.8% >> >90%

**CAPEX aligned with the European Taxonomy**  
92.9% >> ~90%

**Users covered by electricity access programmes**  
15.99 M >> >16 M

**Annual review and update of Human Rights Due Diligence and Stakeholder Engagement Model**

**Facilities aligned with the biodiversity plan**  
199 >> ~700

**Customer Accessibility Solutions**  
63 >> 66

<sup>1</sup> Including discontinued activities, which are not included in the consolidated turnover for the financial year, emissions would be 60 gCO<sub>2</sub>/kWh.
