

Iberdrola, the world's most sustainable electricity company for the seventh consecutive year, according to Clean200

- *The company climbs five places in the global ranking compiled by Corporate Knights and As You Sow, after analysing more than 8,000 corporations worldwide*
- *Iberdrola's position demonstrates that electrification improves energy security and competitiveness while also optimising sustainability*
- *The ranking includes the 200 largest listed companies with the highest revenues from sustainable activities*

Iberdrola is the world's most sustainable electricity company for the seventh consecutive year, according to the *Clean200* ranking compiled by Corporate Knights and As You Sow, after analysing more than 8,000 corporations worldwide.

Since the previous edition, the company has climbed five places to rank 17th among the 200 largest listed companies that make up the ranking based on their revenue from sustainable activities, according to Corporate Knights' Sustainable Economy Taxonomy. With this achievement, Iberdrola demonstrates that it combines sustainability, energy security and competitiveness in its drive for electrification

Clean200 is a joint initiative of As You Sow, a global leader in values-aligned investing, and Corporate Knights, an international firm dedicated to promoting a sustainable economy. Since its creation in 2016, this list has shown that companies focused on clean energy clearly outperform those linked to fossil fuels.

This international recognition is in addition to other recent accolades: Iberdrola stands out among the top companies in the electricity sector in S&P's Sustainability Yearbook 2026. It is also among the highest-scoring companies in the Dow Jones Best-in-Class Indices, where it has been listed for 25 consecutive years, making it the only European *utility* to have been included in this selective index since its creation. In addition, it has once again received an "A List" rating from CDP and is included in the main global ESG indices and ratings, including Moody's ESG, MSCI, Sustainalytics, ISS-ESG, EcoVadis and FTSE4Good.

About Iberdrola

With a market capitalisation of €135 billion, Iberdrola is the largest electricity company in Europe and one of the two largest in the world. The Group serves more than 100 million people worldwide and has a workforce of 46,000 employees and assets exceeding €160 billion. In 2024, Iberdrola recorded revenues of almost €50 billion and a net profit of €5.6 billion. The company contributes nearly €10.3 billion in taxes in the countries where it operates and supports more than 500,000 jobs among its suppliers thanks to purchases that exceeded €18 billion in 2024.

Since 2001, Iberdrola has invested more than €175 billion in electricity grids, renewable energies and energy storage to contribute to the creation of an energy model based on electrification. The company has nearly 1.4 million kilometres of electricity grids in the United States (New York, Connecticut, Maine and Massachusetts), the United Kingdom (Scotland, England and Wales), Brazil (the states of Bahia, Rio Grande do Norte, Pernambuco, São Paulo and Mato Grosso do Sul, as well as Brasilia) and Spain, as well as 57,000 MW of capacity worldwide, of which more than 45,000 MW is renewable.
