

Sustainability at Iberdrola

Results presentation
First half 2026

We are making good progress on our roadmap

Boosting electricity
as a safe, self-sufficient and competitive energy source

Strengthening human and social capital

Promoting **good governance** in accordance with the Group's Ethical and Basic Principles and applicable rules and regulations

Protecting **nature** and promoting the **efficient use of resources**

Promoting a **sustainable value chain**

Initiatives during the period

Boosting electricity

Neoenergia has renewed its concessions for a further 30 years and launched a **€9 billion investment** plan for electricity networks through to 2030.

6.4 MW per turbine: Spain's largest and most powerful wind turbines are now generating renewable electricity at the Iglesias wind farm.

The **Valdecañas** and **Tâmega hydroelectric** facilities: grid-scale energy storage through pumped hydro and wind hybridisation.

Strengthening human and social capital

Iberdrola Italia and the Sopowerful Foundation are driving solar energy projects in Malawi and Tanzania.

Promoting good governance

Iberdrola has become the first European company to receive the **Compliance Programme of the Year** award from Compliance Week and the Ethics & Compliance Initiative.

Protecting nature

ScottishPower is restoring **22.5 hectares** of peatland to enhance biodiversity and increase carbon capture.

Sustainable value chain

Iberdrola España is promoting the electrification of **maritime transport** by supplying renewable shore-side electricity at ports.
