

Iberdrola inaugurates Fénix, its largest photovoltaic plant in Italy with 243 MW

- *The facility generates nearly 400,000 MWh annually, enough to cover the equivalent consumption of more than 140,000 homes*

The plant has long-term power purchase agreements (PPAs) signed with leading Italian companies, which cover most of the facility's production and contribute to stabilising energy costs and strengthening the competitiveness of the industrial fabric

Iberdrola has inaugurated its largest photovoltaic plant in Italy in Sicily. With 243 MW, Fénix is already in operation and its annual production is close to 400,000 MWh, enough to cover the equivalent consumption of more than 140,000 homes.

Located between the municipalities of Centuripe, Paternò and Belpasso, in the provinces of Enna and Catania, Fénix reinforces the country's clean and indigenous generation capacity. The facility, whose construction has been carried out by more than 500 professionals at the peak, has more than 413,000 bifacial photovoltaic modules and is connected to the electricity system through 26 kilometres of medium voltage lines and 9 kilometres of high voltage lines.

This is a key infrastructure to boost the electrification of the productive fabric: most of its production is committed through long-term purchase agreements (PPAs) with top-tier Italian companies, which helps to stabilise its energy costs, guarantee security of supply and strengthen its competitiveness.

The opening ceremony was attended by Hugh Elliott, executive president of Iberdrola Energía Internacional, and Valerio Faccenda, *country manager* of Iberdrola Italia, as well as institutional representatives, including Miguel Ángel Fernández-Palacios Martínez, Spanish ambassador to Italy, as well as regional and municipal authorities.

Fénix is a milestone in Iberdrola's growth in Italy. Its implementation contributes to a safer, self-sufficient, sustainable and efficient energy model that boosts job creation, industrial competitiveness and the well-being of communities.

About Iberdrola

With a capitalisation of more than 140,000 million euros, Iberdrola is the largest electricity company in Europe and one of the two largest in the world. The Group serves more than 100 million people worldwide and has a workforce of 45,400 employees and assets of €161 billion. In 2025, Iberdrola recorded a record net profit of €6,285 million. The company provides nearly €10.4 billion in tax contributions in the countries in which it operates and supports more than 500,000 jobs across the supply chain, thanks to €13.2 billion in purchases from tens of thousands of suppliers.

Press Release
June 25, 2026

Since 2001, Iberdrola has invested more than 175,000 million euros in electricity grids, renewable energies and energy storage to contribute to the creation of an energy model based on electrification. The company has nearly 1.4 million km of power grids in the United States (New York, Connecticut, Maine and Massachusetts), the United Kingdom (Scotland, England and Wales), Brazil (states of Bahia, Rio Grande do Norte, Pernambuco, São Paulo and Mato Grosso do Sul, as well as Brasilia) and Spain, as well as 58,000 MW of capacity worldwide. of which more than 46,000 MW are renewable.
