Iberdrola rated best European utility by the Institutional Investor Research Group

Iberdrola has been ranked as the best European *utility* for analysts and investors by the Institutional Investor Research Group, in its most recent All-Europe Executive Team ranking.

The survey conducted by Institutional Investor, a leader in its sector, gathers the opinions of investors and analysts. This time, more than 2,000 professionals voted, and Iberdrola came top of the list as the most outstanding company in its work with financial markets.

To select the best companies, survey participants have to assess aspects such as ease of access to financial data, information disseminated about the company and the quality and depth of the answers to their questions.

This accolade joins many other awards and acknowledgements received by Iberdrola in this area in recent years as a result of its commitment to transparency and constant dialogue with the financial community.
