

Green hydrogen plant for industrial use

Europe's most ambitious innovation project to promote decarbonisation of industrial sectors

100% Renewable hydrogen for ammonia and free-emission fertilizers production in Puertollano

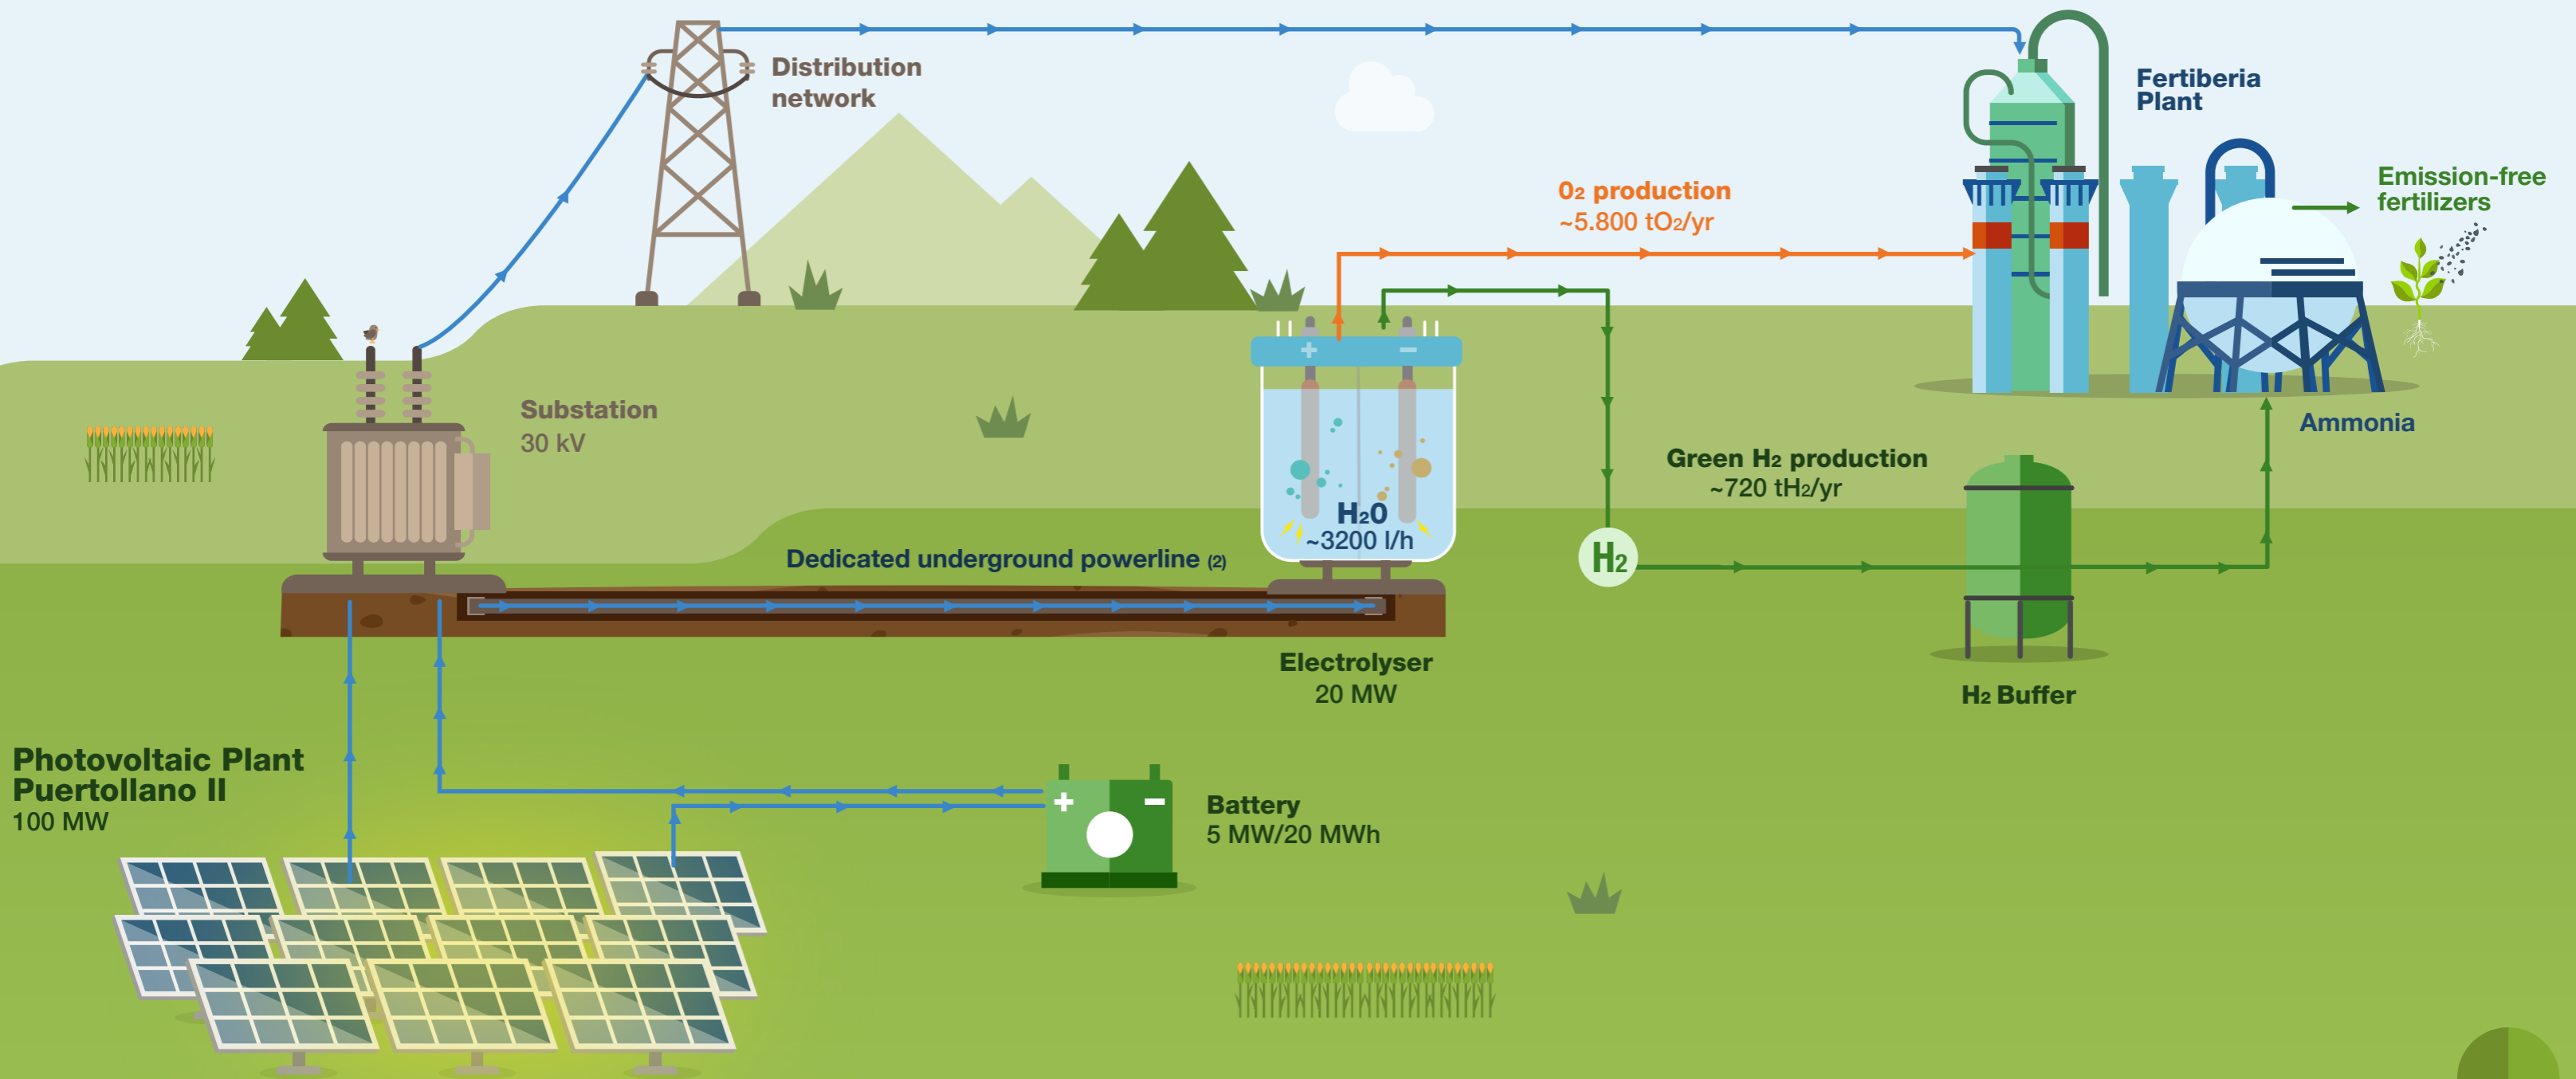

Investment
150 M€

Up to 700 local jobs

CO₂ avoided Emissions (1)
39,000 tCO₂/yr

(1) Avoided emissions include reduction in Fertiberia processes.

(2) Dedicated underground power line for exclusive use, to ensure that all energy used in the electrolyser is renewable and the environmental impact is minimized.
