

The 5 countries most affected by climate change in the 21st century

The devastation caused by hurricane Maria in 2017 left almost **3,000 dead and millions in losses** in the Caribbean country.

Extreme weather events are constant in this Asian country. In fact, this century so far it has suffered **317**.

El **monzón** causa estragos en este país cada año, pero especialmente duro fue su impacto en 2010 dejando **20 millones de afectados**.

The Caribbean country suffered two of the most devastating **hurricanes** so far this century (**Jeanne in 2004 and Sandy in 2016**).

Cyclone Nargis left around **140,000 deaths in 2008** and the country is still trying to recover from the material losses.
