

# Key factors for a disruptive education model

## Customising learning

Tailor-made training is vital to ensure that every student makes **the most of his/her potential.**

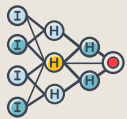

## Committing to early training

The objective is to guarantee the access of students to the current world as **digital natives.**

## Integrating Artificial Intelligence

It is beginning to be used in the **data analysis and management** process to improve education.

## Reinforcing digital skills

Digital training is vital for entering both the current and **future job market.**

## Encouraging critical thought

Professionals must be trained who, as well as consuming information, know how to **analyse and contrast it.**
